DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a pet storage box fixing structure.

Group II, claim(s) 6-11, drawn to pet storage box.

Group III, claim(s) 12, drawn to connection tool.

The special technical feature (SPT) of Group I is a box resting on a seat and a seat belt directly connected to the box. The special technical feature of Group II is a perforated bag with a frame that has a reinforcing belt. The special technical feature of Group III is a pair of restrict belt parts and a pair of stable belt parts. The SPT of Group I is silent from Group II and III; the SPT of Group II is silent from Group I and III; the SPT of Group III is silent from Group II and I. Thus lack of unity is held by the Examiner. See 37 CFR 1.475.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
